Subject: Recommendation for Mr. Devesh Kumar Gola

To Whom It May Concern,

I am pleased to write this letter of recommendation for Mr. Devesh Kumar Gola for the Taiwan Experience Education Program (TEEP). He successfully completed an internship under my supervision in the Applied Genomics Section, Bio-science Group at the Bhabha Atomic Research Centre (BARC), from 20th May 2025 to 10th July 2025.

During his tenure, Mr. Gola worked on the project "Setting up of a Mutation Detection Pipeline Using Publicly Available Sequencing Data," which required a solid technical foundation and attention to detail in handling genomics datasets. He gained experience in initial data analysis and learned to organize the pipeline systematically. Throughout the project, he was professional, and proactive, consistently delivering well-documented outcomes. His ability to work both independently and collaboratively, combined with his analytical approach and sound technical knowledge, was clearly evident.

In summary, Mr. Devesh Kumar Gola is a capable, self-motivated, and an individual with strong technical expertise and a commendable work ethic. I am confident that he will perform well in any academic or professional setting, and I recommend him with great confidence.

Sincerely,

Dhruv Das
